"Ferguson is using the governor's office for purely personal policital gains," he said. "His action in reducing the tax rate 10 cents was purely a political trick. He knew that at the time of the eduction the governor was approving deficulency warrants and that there would be a deficiency. All of these other subjects Ferguson has tried to inject in the campaign were suggested for no other purpose than an effort to arouse a new issue which might detract from the real issue of Fergusonism. Such action in itself constitutes one form of Fergusonism.'

While the immense rally in Dalas Saturday really opened the runoff Moody's address in Greenville Monday night was looked upon as the opening gun of the speaking campaign the attorney general will wage. Because of the shortness of the time between now and the pri-mary it is believed that the plan of holding regional railies will be adopted, with speeches by Moody at principal points only. It is planued to have several counties group together for a rally with a speech by Moody in the most centrally located city. Sawnie Aldredge of Dallas, chair

man of Moody's North Texas cam-paign committee, has announced that no headquarters will be opened in Dallas for the run-off; and that.

#### YOU AND YOUR TOWN.

If you had an automobile that you wanted to sell, you wouldn't go about town constantly talking about its bad points. If you did you wouldn't be likely to sell it.

What would you think of a merchant who made a practice of standing in front of his store telling all passers that his goods were shoddy and not worth much? You would probably say he is crazy and you would be right.

Now this town in which you live is your own; your business is here, your job is here, your property is here. Do you think you are going to make your business any better or adding to the value of your property by standing around and roaring about what a rotten town it is? If you do you'd better see an alienist about your mental condition.

As a matter of fact, every time you "run down" your town, you are hurting your own business and detracting from the value of your own property. Even though you have no pride in your community, you ought to have sense enough not to injure your own interests.

Every business concern in Corsicana, in addition to its stock of goods and plant, has intangible as sets of the greatest value. Among the assets is its good name, its reputation for square dealing. When you hurt the good name of such a concern, you injure it more than you would if you should burn

Besides its business and indus trial institutions, its homes. schools and all other kinds of property, every town has tangible When you talk down your town, you are injuring its good name and thereby giving it a blow of the most serious kind.

If you want your business to be to increase in value, if you want to live in a better town, forget your grouch and begin to talk for your town instead of running it

#### DISCONTENT SPELLS PROGRESS.

In summer folks want to go North, to the mountains or the seashore. In winter they are drawn to the tropics. People living in the East talk about going West and natives of the West believe the rainbow's end is in the East. People without automobiles "would be" satisfied with a small car. Their more fortunate neighbors driving small automobiles hope for a larger car "next year." Every raise in salary suggests another.

This insatiable desire and discontent, which is characteristic of civilized peoples, is man's only inspiration for unceasing accomplishment. Without it there would be no progress, no scientific reearch, no inventions, no industal or commercial achievement.

look with a wideawake and seeing eye at the world around him, and

This is what the real newspaper does today. It is not greatly bothered by persons who say that most of the news should be suppressed necause it is so "awful." newspaper which believes in mirroring life as life really is shows greater faith in human nature than the critics-that is all. When they call this or that piece of news "awful," they often mean seductive rather than awful. They wrongly fear that human nature instinctively craves rottenness and that the exposure of a vile career will prove enticing.

It is no more enticing than the picture of an insane asylum is enticing. It shows as nothing else can show how terrible a thing sin

Every line of the picture thunders with a power denied to speech. The memory of it is burned into the soul with a quenchless fire. The reader old or young serious or gay, can never misunderstand, can never forget. It is a lesson that lasts. It is the truth in flesh and blood-the truth acting itself out before our very eyes in real life.

The Richland Chamber of Com merce held its annual banquet Tuesday. The affair was largely attended by Richland and out-oftown people, a large number going from Corsicana. Richland is one of the most progressive towns in the county and backed by a live chamber of commerce much will be accomplished for its advancement. Located in the center of a rich farming and oil producing section of Navarro county the future holds much for this thriving town and its progressive citizenship.

Another sure sign that Fall is not far distant-The big circus has announced it will show in Corsicana early in October. The circus and the Fall of the year are traveling companions in Texas The announcement that the circus will be in Corsicana will bring a thrill of anticipation to the heart of all of the youngsters-and mos of the growns-ups as well-we might add. Another thing that the coming of the circus evidencesthat is that the community is in' prosperous condition. The circus don't play that part of the country that is not prosperous.

Many oil operators who have been absent from this section are now returning with the increased activities in the Corsicana-Mexia district. The Nigger Creek field near Mexia has all the ear marks of a real find and many are predicting that other producing pools are sure to be uncovered in Navarro county. It will be many years before the oil resources of better, if you want your property this section of the state have been thoroughly exploited. A number o wildcat tests are now in the course of drilling in this county.

> Observe the boulevard stops. Of course it may inconvenience you a little to have to bring your car to a standstill but when you do you are helping to eliminate the accident hazard. By stopping you may save your own life or another life. It is not much trouble to stop and it makes automobile traffic much safer.

On account of the activities of various cotton pests one of the best known cotton men in the state is advising the farmers to hold the staple for twenty cents. He also predicts thirty cent cotton by the first of the year. Big money for a small crop is far better than little money for a big

Within 10 years, says an engineer, we shall be able to see the person to whom we are talking on the phone. It will seem strange for a time to hear the irate subscriber exclaim, "See here, cen-

tral, you gave me the wrong face." Regardless of the hot gubernatorial campaign the people of Navarro county are still talking good roads and indications are that another bond election is not far off.

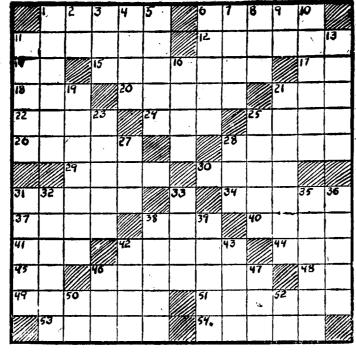

"Every cloud has a silver lining"—and even though vacation days will soon be over the small boy should remember that it will certain critics of also soon be circus days again.

### To Those Who Judge Quality by Price

The following statement previously made in an advertising message, is repeated here because of its great significance to the motoring public:

"If any other manufacturer endeavored to produce a car similar to Ford, according to the high standard of quality in material and workmanship used by the Ford Motor Company and with the same tried and proven design, it would be impossible to offer it at anything like Ford prices. And it is well to note that even with less costly design they have not been able to meet Ford prices

# "Ben" Said to "Bill" as They Talked About the Home Town

"Bill, did you ever sit out on the porch, after the folks had gone to bed, and just think it through for hour or so, about what a great change has come over Corsicana during the past year or so?"

"Since you mentioned it, I've done just that, and you're right, there's been some wonderful changes come over Corsicana"

"Go back to about the time when Tenth

Street was a mud hole and other things that have been improved were in the fix they were in."

"What has done it?"

"There you are. You are getting to what I want to talk about. It's the 'Corsicana Spirit." There isn't a thing in Texas that equals the Corsicana Spirit---the ruling dynamo that really guides folks here."

"I was just taking a walk today and thought as I walked, that the fellows who have been hollering a fifty-thousand town here in five years are not going to miss it, are they? It's really in sight. The improvements point to it from any direction you look. The indications all are pointing to a city of forty to fifty thousand population in a few years."

"Now, 'Bill' here is what I started out to say. The current is all Corsicana's way now, and we are going fine. But did you konw that we can go better and faster, if we'd just row a little, too." We folks who live in Corsicana are fortunate. And the thought that I want to get to you is if we just start rowing—and row together, we can go right along even better than we are now going.

"The merchants and business men of Corsicana who are running this double page advertisemet through the summer time. It is not making them money ot speak of from a visible standpoint, right now. But what they are doing, they are showing to their friends and customers that right on through the summer time they don't want to lose the friendship of their customers just because it is hot and busness is not as good as it is in the winter time. I'm strong for the fellers who keep on going on-don't give up when it gets too hot or too cold. Its just kinda like keeping up acquaintances with your friends, if you didn't see them once in a while, you'd forget them. So it is with advertising. The only way a fellow knows that a merchant or business man appreciates us buying their goods or using their products, is for them to do a little extra advertising and tells us, right out in the summer time—even if it is hot. I like it, myself— I like to be shown that my business is appreciated.

"Ben," you are right. Corsicana is growing and we should appreciate our merchants who are not afraid to blaze on through even while the hot sun shines."

"Altogether for a greater Navarro County and a bigger Corsicana."

Pangburn's Ragtime Chocolates are rapidly becoming nationally known. The reason for this is not so much the newspaper and magazine advertising as it is the superior quality the ingredients that enter into them, and the care used in their manufacture.
